

Becatech

Interconnective Power

**Data cable flex SF/UTP PVC
(cat 5 cable)**

Cable Structure :

Conductor: solid bare copper.

Insulation: polyethylene.

Screen: plastic-laminated aluminum foil, tinned copper wire braid.

Outer sheath: special PVC.

Technical Specification :

Rated temperature operating: -30°C to 60°C.

Rated temperature during installation: 0°C to 50°C.

Rated bending radius during installation: 48mm.

Rated bending radius operating: 24mm.

Flame resistant according to IEC 60332-1-2.

Application :

For analogue and digital signal transmission in industrial environments.

Horizontal and building backbone cable.

| Core x Pair x AWG | Insulation Diameter mm | Outer Sheath Diameter mm |
|----------------------|------------------------------|-----------------------------------|
| 4x2xAWG24 | 1.05 | 6.0 +/- 0.3 |
